Profile

Results driven Back-End Developer with professional expertise in Laravel and CodeIgniter, specializing in building scalable systems using Modular Architecture. Proven track record in developing robust REST APIs for web and mobile applications and integrating third-party services.

Experience

Software Engineering - Back-End Developer 2025 – Present

Softa Solutions · Full Time Alexandria, Egypt

- **ERP & CRM Architecture:** Designed and developed robust ERP and CRM systems from scratch using Laravel and CodeIgniter, implementing modular backend architectures for independent task execution and seamless code reusability.
- **Third-Party & API Integration:** Integrated third-party services including payment gateways and shipping company APIs, while developing and exposing secure, scalable RESTful APIs to bridge the backend with mobile and web development teams.
- **E-Commerce Development:** Built and scaled full-stack e-commerce platforms, delivering robust server-side logic, database management, and seamless integration with front-end components to ensure high performance and smooth user experiences.
- **System Optimization & Maintenance:** Managed post-delivery projects, debugged complex issues, analyzed technical documentation, and resolved architectural gaps to improve overall application stability.

Programming Instructor 2025 – Present

Future Code Academy . Hybrid Alexandria, Egypt

- Instructed students on core and advanced programming using Python, data structures, algorithms, and OOP principles.
- Guided students through building real-world projects with a strong focus on clean code and problem-solving techniques.
